

## HEALTH UNITS OF TIMELY DETECTION

The Wholesale Market of Mexico City brings closer health services offered by the Government of the Federal District, through the Ministry of Health of the Federal District, and provides a scheme for prevention and timely detection of diseases such as diabetes, hypertension, obesity and various types of cancer, among others, through the use of state-of-the-art technology in laboratory and cabinet studies. They are two Timely Detection Health Units (USDOs) installed in the CEDA that offer high quality health diagnostic studies to the Community of this business center and their families, as well as the population in general.

### HEALTH UNITS ARE LOCATED IN:

- Main road, near the bridge of aisle 4, of Fruits and Vegetables Sector
- Corridor K-L, aisle 2, in the Fruits and Vegetables Sector

The requirements for these free tests are that the interested person resides in Mexico City, has its affiliation to the system of social protection in health of the Government of the Federal District or is entitled to the Seguro Popular (Popular Insurance) and goes to the USDO to request attention. These studies are also available for anyone who is not affiliated, at a minimum cost.

Each of these units has a clinical laboratory, cabinets for mammography and obstetrics, densitometry, electrocardiography and mastography; in addition to optometry services, dental diagnosis, vaccination services, sexual health, nutrition, rapid tests for HIV and cervical cancer detection, among others.

### SCHEDULE OF ATTENTION:

Monday to Friday from 07:00 a.m. to 04:00 p.m.  
And Saturday from 08:00 to 13:00 hours
